(54) ELECTRONIC EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide electronic equipment which has high input operability in inputting character information, whose displaying part is eye-friendly and which has high portability.

SOLUTION: This electronic equipment is provided with a first main body part having an input displaying part 4, a second main body part 2 located on the rear face side of the first main body part 1 and having a keyboard part 10, and a connection mechanism 3 for slidingly moving the second main body part 2 to a position where the keyboard part 10 overlaps on the first main body part 1 and to a position where the keyboard part 10 exposes itself from the first main body part 1 and also erecting the first main body part 1 corresponding to the second main body part at the position where the keyboard part 10 exposes itself. Then, if the second main body part 2 is slid to the position where the keyboard part 10 overlaps on the first main body part 1, the entire equipment becomes compact to be satisfactorily portable. Also, if the second main body part 2 is slid to the position where the keyboard part 10 exposes itself from the first main body part 1, the keyboard part 10 is used to be able to input information such as characters. Also, if the first main body part 1 is erected corresponding to the second main body part 2, it is possible to make the input displaying part 4 to be eye-friendly in performing an input operation on the keyboard part 10.
